

## NoetixAnswers™ for Oracle® E-Business Suite, PeopleSoft Enterprise, and Siebel CRM

### Immediate Answers to Common Business Questions

A powerful component of the Noetix solution, NoetixAnswers provides instant answers to common business questions—without resource-intensive report development. Built using patented Noetix MetaBuilder™ technology, NoetixAnswers rapidly creates application-specific reports, automatically customized to each business without requiring data mapping, table joins, or complex SQL code. Used with popular query and reporting tools such as Noetix WebQuery®, Cognos Report Studio, BusinessObjects Web Intelligence, or Oracle BI Answers, NoetixAnswers creates a folder structure within the query tool of choice, enabling users to quickly locate their pre-built reports which they can modify or execute immediately, resulting in fast deployment and easy information access across the enterprise.

### Custom Reports with Minimal Development

Upon installation, Noetix MetaBuilder examines the configuration of each Oracle E-Business Suite, PeopleSoft Enterprise, and/or Siebel CRM application setup and automatically creates reports that reflect the unique customizations of each business, including key and descriptive flexfields and lookup values from Oracle E-Business Suite, custom fields in PeopleSoft Enterprise, and the field and column labels from Siebel CRM user interface screens.

### Comprehensive Report Library

NoetixAnswers addresses the most commonly asked business questions. Noetix provides more than 900 answers for Oracle E-Business Suite, more than 120 answers for PeopleSoft Enterprise, and literally thousands of answers for Siebel CRM. Pre-built reports provide a strong foundation for rapid report deployment and customization without complicated IT development or costly consulting resources, significantly reducing the time required to access critical business information.

### Simple Report Modification

NoetixAnswers allows users to easily modify any aspect of a Noetix answer such as which columns are included, how the results are sorted, what filters or parameters are used, and how the report is formatted. Additionally, users can create new columns based on calculations or custom expressions giving each individual user the ability to view the information needed in the preferred format.

### More Than 1,000 Pre-Built Reports

See the sample list of questions by application that NoetixAnswers reports are designed to answer.
